

Ontario Directors Report

CSCT AGM March 13 2021

Greetings from the OSCT,

It's been an interesting year for the OSCT. We are currently organizing a virtual AGM to take place later in the spring. We have had 2 director positions open up over the last few months and are actively looking for replacements to help assist with the AGM planning.

The new site for members to access their profiles has had wonderful feedback from members and directors. The new features are more streamlined and will make accessing and populating data more efficient and allow members better control over their information.

The OSCT has developed additional online opportunities to assist our members in obtaining CEUs by developing a survey and a follow-up quiz. These were very informative in seeing how both the OSCT and CSCT are viewed by the members and their understanding of our respective roles. The results were posted to the OSCT website in November 2020.

The greatest disappointment for our members as well as other technologist roles, was our exclusion from Ontario's pandemic pay. The OSCT produced a petition with 5000+ signatures, sent letters to our Premier, and other key MP's to plead our case but were ultimately unsuccessful. Many of our members continue to grapple with working through the pandemic and have done amazing work serving their communities.

Respectfully submitted,

Blair Arnold RCT
Ontario Director
